Education

Computer Systems Development

Since Sept. 2024 [institut supérieur d'étude technologique](#) sousse

Baccalaureate in Mathematics

From Sept. 2013 to Jun. 2014 [Lycée Abd laziz el behi](#) sousse

Work experience

Web developper

Since Feb. 2024 [Satoripop](#) Sousse

- Develop and maintain scalable web applications using **PHP and Laravel**.
- Build modern, responsive user interfaces using **HTML, CSS, JavaScript, Tailwind CSS, Bootstrap, and Livewire**.
- Develop dynamic administrative interfaces and dashboards using **Filament**.
- Design and implement reusable components, features, and business logic following **MVC and OOP principles**.
- Design, develop, and integrate **RESTful APIs** for internal and external applications.
- Design and optimize relational databases using **MySQL and PostgreSQL**, including complex queries, relationships, migrations, and data management.
- Write clean, secure, maintainable, and reusable code following software development best practices.
- Implement authentication, authorization, validation, middleware, and other **application security measures**.
- Integrate third-party services and APIs into web applications.
- Troubleshoot, debug, and resolve technical issues in development and production environments.
- Optimize application performance, database queries, and front-end loading times.
- Use **Git, GitHub, Bitbucket, and GitLab** for version control and collaborative development.
- Deploy and maintain applications on **Linux servers using Nginx/Apache, SSH, cPanel, and related hosting environments**.
- Participate in the complete **Software Development Life Cycle (SDLC)**, from requirements analysis and development to testing, deployment, and maintenance.
- Collaborate with developers, designers, and stakeholders to deliver projects according to technical and business requirements.
- Conduct code reviews and contribute to improving code quality and development standards.
- Develop and maintain technical documentation for applications and APIs.
- Explore and integrate **AI technologies and LLM APIs**, including **Anthropic Claude**, into software development workflows and applications.
- Stay up to date with emerging technologies, frameworks, and best practices in web and software development.

Web developer

From Jan. 2021 to Nov. 2023 [Tounes Connect](#) sousse

- Develop and maintain web applications using Laravel and PHP.
- Write efficient, secure, and reusable code.
- Participate in the entire software development life cycle, from concept to deployment and beyond.
- Conduct code reviews and provide constructive feedback to peers.
- Troubleshoot and debug issues that arise during development and production.
- Continuously improve development processes and tools to increase productivity and efficiency.
- Keep up-to-date with emerging web technologies and trends.
- Deploy applications to production servers and manage hosting environments.
- Implement security and data protection measures to ensure the safety and privacy of users' data.
- Mentor junior developers and contribute to a positive and collaborative team environment.

traineeship

Web Development Intern

From Nov. 2020 to Dec. 2020 [Tounes connect](#) sousse

Collaborated with the design team to develop the website's user interface and user experience.

Implemented various features using the Laravel framework, such as a contact form and a catalog.

Worked with the database to ensure data integrity and efficient data retrieval for the website.

Optimized the website's performance by implementing caching, reducing page load times, and optimizing images.

Conducted testing and debugging to ensure the website was bug-free and functional.

traineeship

Web Development Intern

Oct. 2020 [optima tec](#) sousse

- Developed a fully functional e-commerce website using PHP and Laravel framework, integrating payment gateways, product catalog, shopping cart, and order management system.
- Designed and implemented a responsive user interface using HTML, CSS, and JavaScript, ensuring a seamless experience across all devices.
- Created a robust database schema to manage product information, customer data, and order processing, optimizing queries for maximum performance.
- Conducted thorough testing and debugging to ensure high quality and error-free code, improving the website's functionality and user experience.

Technical Skills

- **Programming Languages:** PHP, JavaScript, SQL
- **Web Frameworks:** Laravel, React.js, Vue.js, Node.js
- **PHP Ecosystem:** Composer, Laravel Artisan, Eloquent ORM
- **Admin & Reactive Frameworks:** Filament, Livewire, Alpine.js
- **Front-End Technologies:** HTML5, CSS3, Tailwind CSS, Bootstrap, jQuery, AJAX
- **Database Management:** MySQL, PostgreSQL, MariaDB, SQL
- **API Development:** REST APIs, JSON, API Authentication
- **Version Control:** Git, GitHub, GitLab, Bitbucket
- **Server & Deployment:** Apache, Nginx, cPanel, SSH, .htaccess
- **Development Tools:** Visual Studio Code, npm, Composer
- **File Transfer & Hosting:** FileZilla, cPanel, FTP/SFTP
- **Authentication & Security:** Laravel Authentication, Middleware, CSRF, API Authentication
- **Email & Communication:** SMTP, Mail Services
- **Performance & Optimization:** Database Query Optimization, Caching, Lazy Loading
- **SEO:** On-Page SEO, Technical SEO, Meta Tags, Sitemap Optimization
- **AI & LLM:** Anthropic Claude API, AI-assisted Development
- **Other:** Responsive Web Design, MVC Architecture, CRUD, OOP, AJAX

Tools and Platforms

- **Version Control:** Git, GitHub, GitLab, Bitbucket
- **Project Management & Agile:** Jira
- **IT Service Management:** GLPI
- **Development & Deployment:** Visual Studio Code, FileZilla, cPanel
- **Third-Party Integrations:** PDF, QR Code, Excel, Image Processing, Shopping Cart, SMTP, REST APIs

Server Management

- Hosting Platforms:

Experienced in managing web hosting services like :

- * OVH
- * GoDaddy
- * Mailchimp
- * ZenHosting
- * Orange
- * TopNet

- Configured server settings, DNS management, and ensured smooth deployment of web applications on various hosting environments.
